

PLUS: PLAN YOUR JOURNEY WITH MYPLUS-TTA IN CONJUNCTION WITH DEEPAVALI AND ADDITIONAL SCHOOL HOLIDAYS

Petaling Jaya, 16 October 2025:- PLUS Malaysia Berhad (PLUS) anticipates an increase in traffic of up to 2.2 million vehicles daily on peak days on its operated highway network on 17 October, 18 October and 21 October 2025 in conjunction with the upcoming Deepavali holiday as well as additional school holidays announced by the government.

PLUS has prepared and placing special focus on traffic distribution, congestion management and user comfort to help the public enjoy a smoother, safer and more comfortable journey on the highways during this Deepavali festive season.

50% toll discount from 18 October to 19 October 2025

The government has announced a 50% discount from the usual toll rates for Class 1 vehicles (Class 2 vehicles on the Penang Bridge) from 18 October 2025 until 19 October 2025 in celebration of this year's Deepavali festival.

This 50% toll discount will be implemented on all highways starting from 12.01 am on 18 October 2025 (Saturday) and ending at 11.59 pm on 19 October 2025 (Sunday) at all toll plazas EXCEPT for the toll plazas at the country's border entry points, namely Bangunan Sultan Iskandar Toll Plaza and Tanjung Kupang Toll Plaza (on the Malaysia-Singapore-Second Link Highway - Linkedua).

Plan your journey earlier with MyPLUS-TTA

To distribute traffic, PLUS will issue a travelling schedule through a digital approach using MyPLUS-TTA. Therefore, highway users are advised to plan their journeys earlier and obtain the travel schedule via MyPLUS-TTA in the PLUS application for journeys on the PLUS Highway and the Lebuhraya Pantai Timur 2 (LPT2) between this upcoming 17 October and 22 October.

With the latest improvements, MyPLUS-TTA is now accessible not only during festive seasons but also on selected peak days. It is designed to help highway users plan their journeys on the PLUS Highway and the Lebuhraya Pantai Timur 2 (LPT2) more efficiently and to help ensure a smoother traffic flow.

Therefore, PLUS advises the public to arrange their travel schedules based on the MyPLUS-TTA not only for journeys leaving out Klang Valley to their hometowns, but also to arrange their return journeys back to Klang Valley after the Deepavali holiday. To access the digital MyPLUS-TTA travel schedule, download or update the PLUS app to plan your trip more easily.

28 Smart Lane locations on the highway

To manage congestion and smooth traffic flow, PLUS will activate Smart Lane at 28 locations on the highway to facilitate smoother traffic movement at critical highway locations during this Deepavali festive season.

(Please refer to Appendix A for the Smart Lane activation locations).

Smartlane can be identified by the Green Flashing Light and notification signboards installed at specific locations to indicate that the Smartlane is activated and available for use. PLUS also advises highway users to follow real-time instructions from on-site personnel and fully cooperate when the Smartlane is in operation.

The Smart Lane can be used for light, private or passenger vehicles. When the Smart Lane is activated, highway users are advised to drive at the recommended speed limit of around 60 km/h. However, highway users are strictly prohibited from using the emergency lane where the Smart Lane is not activated to avoid facing legal action by the authorities.

Meanwhile, PLUS will ensure no lane closures for maintenance works on the PLUS Highway and Lebuhraya Pantai Timur 2 (LPT2) from 17 October to 23 October 2025 in conjunction with this festive season. However, exceptions are made in the event of accidents, emergency works or critical repairs that pose risks to highway users' safety and need to be resolved immediately.

User comfort

To help smooth the movement of the public's journey during this Deepavali festive period, PLUS also takes several other measures including preparations at toll plazas and rest and service areas (R&R).

PLUS also requests the cooperation of the public to plan their journeys and use other public facilities such as restrooms and prayer rooms provided at toll plazas or the nearest rest areas along the highway.

(Please refer to Appendix B for PLUS preparations)

MEDIA STATEMENT

At the same time, highway users can also obtain the latest traffic information through the PLUS application, Virtual Assistant - PUTRI, X@plustrafik app, Electronic Signboard (Variable Message Signs) at selected locations or through the country's main radio station channels.

The public can also contact the PLUSLine at 1800-88-0000 if they need assistance during an emergency. We also advise users to use the PLUS app, Waze app or Google Maps to plan and get better travel plans during this holiday season.

Besides that, highway users are advised to ensure the balance of the Touch 'n Go and eWallet (for RFID users) is sufficient before starting the journey. Also, make sure the Touch 'n Go card is not expired and check the card status through the Touch 'n Go portal or application.
