

TRAFFIC DIVERSION FOR BEAM INSTALLATION WORKS AT THE JOHOR LANE WIDENING CONSTRUCTION PROJECT ON THE NORTH-SOUTH EXPRESSWAY FROM YONG PENG (NORTH) TO SENAI (NORTH)

Petaling Jaya, 5th December 2025:- The construction of the additional lanes on the North-South Expressway from Yong Peng (North) to Senai (North) is actively progressing as part of efforts to provide more comfort and convenience for highway users in the future. The widening works also involve several bridges crossing the highway mainline along the Kulai–Sedenak stretch.

To facilitate the construction project, PLUS Malaysia Berhad (PLUS) would like to inform that a series of traffic diversions will be implemented along the Kulai–Sedenak stretch from 8 December to 11 December to facilitate safe installation of bridge beams as follows:-

Location	Direction	Duration
KM37.6 – KM37.7	Both Bounds	10 pm – 5 am

Throughout this period, vehicles will be diverted to the rightmost lane to create a safe working zone while minimizing traffic disruptions for highway users.

As such, highway users are advised to plan their journeys accordingly and use the PLUS App to obtain the latest traffic updates. Users are also reminded to adhere to all signage and instructions issued by PLUS personnel when passing through the construction areas.

For real-time traffic information and assistance, highway users may refer to PUTRI (PLUS Virtual Assistant), follow X@plustrafik, check the electronic message boards (VMS) at selected locations, or contact PLUSLine at 1800-88-0000 in case of emergencies.

PLUS appreciates the patience and cooperation of all highway users during this period, as these works are carried out for the safety, comfort, and convenience of everyone.

– END –
